WHAT SETS US APART?

Warehouse Management

Warehouse management helps centralized management of activities like tracking Inventory level/stock locations/Discrepancy in a warehouse and it provides management with the information it needs to efficiently control overall warehouse material movement.

Customer Promotions

Track of customer buying trends, multi-tier loyalty programs, gift vouchers such as e-voucher & mobile voucher generation, coupon redemption and bill busters are some of our customer promotions.

Purchase Management

Purchase of goods with best price and terms streamlined to deliver the best profit for the retail outlet. Optimized purchase workflow from Purchasing activities, receiving goods, validation of the returned goods, identification of damaged / excess goods and its return to store are established well.

Product Classification – Matrix Based

Accurate matrix classification is done on product's quantity based on its attributes. Significant features like color, size, brand, season, brand type are classified. Proper check and maintenance of a product and its variant's quantity is achieved successfully.
