WHAT SETS US APART?

Effective Drug Management

Expiry and scheduled drugs are accurately tracked. Alerts/Reports are triggered when drugs near expiry and when schedules drugs are dispensed without prescriptions. Alerts are available during purchase to avoid stocking products expiring in the short term.

Inventory Control

Maintaining a good historic record of all the stocks is established with the help of our accurate inventory management system. Product & quantity updates, stock – tracking, transfer, correction, storage tracked by rack visibility helps in maintaining an optimal inventory.

Insurance Management

Management of effective insurance process like insurance company, TPA, Network Plan, Treatment, Tiers, eligibility check, calculation of co-payer & insurance value for the bill, claim & co-payer bill generation, claims & remittances management, integration of insurance claims process & billing with web services /support are managed well.

Product Equivalents

Know more about the product while billing – Product composition – Drugs, Product classification, schedule details etc. It is possible to know the product equivalents, based on the composition. If the composition is entered, it is possible to know all the available brand names for effective customer service.
